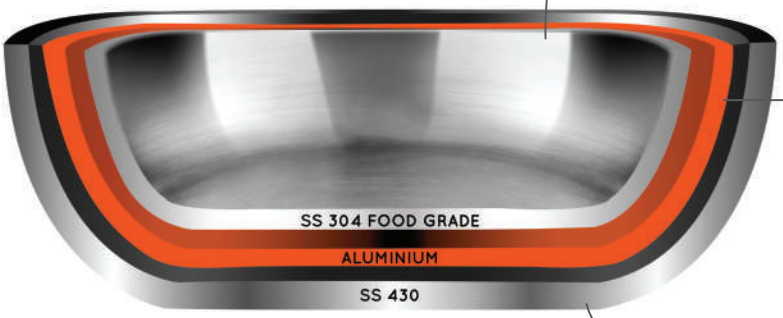
trisara

triply collection

WHY CHOOSE TRISARA TRIPLY?

Three layers. One intelligent construction.



304 Stainless Steel (Inner Layer)
Food-grade and non-reactive,
This is the only layer that comes in contact with food.
Safe, hygienic, and rust-resistant.

Aluminium Core (Middle Layer)
Sandwiched between steel layers,
Never touches food, but ensures quick,
even heating and better fuel efficiency.

430 Stainless Steel (Outer Layer)
Induction-compatible and tough.
Built to withstand daily use.

Trisara cookware is engineered with triply technology — a precise blend of performance, safety, and durability designed for modern Indian kitchens.

CRAFTED FOR CONFIDENT COOKING

- **Sturdy Handles :** Reliable grip with lasting durability.
